

Interactivos? Lima'08: *Magic and Technology*

Advanced Project Development Workshop

Organized by:

Centro Cultural de España en Lima – The Spanish Agency for International Development Cooperation [Agencia Española de Cooperación Internacional para el Desarrollo (AECID)]
Medialab-Prado – Área de las Artes del Ayuntamiento de Madrid

Lead by:

Julian Oliver (New Zealand/Spain)
Clara Boj (Spain)
Diego Díaz (Spain)
Kiko Mayorga (Peru)

Dates: October 10 through 24, 2008

Application deadline: August 31, 2008

Venue: Centro Cultural de España en Lima – AECID

INTRODUCTION

This new edition of *Interactivos?* is inspired by the strategies of magic and illusion, in order to harness some of the old and new technological resources to collectively build software pieces and interactive installations which can propose a rethinking of the usual scenario in magic tricks, marked by a very clear separation between the wizard and the spectators.

Magic and illusion have always gone hand in hand with technology; from mechanical illusions, optical and mirror tricks, through the incorporation of electricity and the filmed image, to digital technology: augmented reality, reactive objects, reality hacking or immersive spaces.

This open call follows the one celebrated with the same title in Madrid in 2007 and suggests to broaden the topic “Magic and Technology” through the exploration of the meanings of the magic concept within the local context of Peru.

Through a programme of reflection, research and production, *Interactivos?'08: Magic and Technology's* goals are:

- To propose magic and illusion as an approach for experiments on perception and attention, behaviour and social relationships.
- To propose a critical viewpoint on the seduction of technology and its application on the spectacle

as a tool of persuasion and control.

Teachers summoned for the management of the workshop are acknowledged experts in the fields of the developing, application and spreading of open software and open hardware in creative processes and have also a long experience in the educational field and in the management of workshops.

SUBMISSION CALL GUIDELINES

AIMS OF THE CALL

- The purpose of this call for projects is to select no more than 10 projects to be carried out in a workshop held at the Centro Cultural de España en Lima between October 10 and 24, 2008.
- At the end of the workshop, the projects will be exhibited at the Cultural Centre of Spain in Lima between October 24 and November 6, 2008.
- The workshop proposes to explore the use of open hardware and software tools in a collective and interdisciplinary manner in order to create technological prototypes with success in the Media from different perspectives: playful, creative and critical.
- The call is aimed at artists, magicians, engineers, musicians, programmers, designers, architects, hackers, psychologists, or any other person interested in presenting a project on this topic.
- The call is open to projects and collaborators from international and local spheres.
- The proposals can be presented individually or as a collective. Each participant or team can present as many projects as they would like.

GENERAL CHARACTERISTICS OF THE WORKSHOP

Methodology

This workshop aims to be a collective platform for research, production, and learning, offering substantial help and support in developing the projects selected. The proposals will be carried out in multidisciplinary task groups comprised by the author(s) and interested collaborators, with conceptual and technical advice from the teaching staff.

The selected projects must be open to the participation of other interested collaborators, who will be able to contribute to the production of the pieces during the development of the workshop. Therefore, there are two levels of involvement with the workshop:

- 1 - as a project leader
- 2 - as a collaborator in any one of the selected projects

Once the projects have been selected, the second step in the process will involve a new call for those people who would like to participate in the projects' production. The **call for collaborators** will be published on **September 17** at the Medialab-Prado and Centro Cultural de España en Lima websites.

Medialab-Prado and Centro Cultural de España en Lima will do their best to provide the materials needed to carry out the selected projects.

Technical Requirements

The selection committee will carefully examine the technical viability of the projects. For this reason, a clear specification of the technical and spatial requirements of the projects will be positively received.

The projects will be developed at the place appointed by Centro Cultural de España en Lima. *Interactivos? '08* will only provide the equipment and means of production for the selected projects if previously requested by the project authors.

In case of any doubt regarding the technical requirements, the selection committee will contact the project's author.

Workspace

The work/exhibition space has a surface of approximately 200 m² and will be shared by all the selected projects. Each project will have a designated space depending on its technical and spatial characteristics. Only the projects which can adapt to the characteristics of this shared workspace will be selected.

In case of any doubt regarding the spacial requirements of a project, the selection committee will contact the project's author.

Working language

The workshop will be held in English and Spanish without translation.

Lodging and travel

Pending application and for participants residing outside Lima, lodging will be provided at a hostel for the authors of the selected projects.

Travel expenses will also be covered for one person for each of the selected projects.

Registration

All those interested in taking part in the workshop must fill in and send the application form published on both websites of Medialab-Prado (<http://medialab-prado.es/>) and Centro Cultural de España en Lima (<http://www.cclima.org/>).

Application deadline: August 31, 2008 at Midnight (Lima local time)

Further information:

For further information contact: interactivos08@medialab-prado.es and interactivoslima@cclima.org

FINAL DECISION

The selection committee will comprise the workshop instructors, Medialab-Prado and Centro Cultural de España en Lima.

Project assessment

Projects will be selected based on the following criteria:

- Project quality
- Suitability to Interactivos? general objectives and the specific theme of this call for projects
- Technical feasibility and clarity
- Willingness to collaborate with others in project development

Date and place of publication of the final decision

The final decision will be announced on **September 10**, on both websites of Medialab-Prado (<http://medialab-prado.es/>) and Centro Cultural de España en Lima (<http://www.cclima.org/>), and all applicants will also be notified of the decision by e-mail.

EXHIBIT OF RESULTS

After the workshop has ended, the projects developed will remain on public exhibit on the premises of the Centro Cultural de España en Lima between October 24 and November 6 November, 2008.

WINNER' OBLIGATIONS

- The winning individuals or groups agree to attend the encounter between **October 10 and 25, 2008**. They also agree to finish their proposed projects, as far as possible.
- The winning individuals or groups may use equipment, pending prior application and approval. Any expense not previously planned or approved in material or equipment rental will be paid by the project authors.
- Projects carried out will be the property of their author(s), although whenever said projects are shown at festivals or exhibits, and whenever images of said projects are reproduced in catalogues or websites, their relation with the *Interactivos?* project organized by Medialab-Prado and Centro Cultural de España en Lima should be mentioned. The names of the people who collaborated in developing the projects should also be shown.
- Projects exhibited may be shown in printed catalogs and the Centro Cultural de España en Lima and Medialab-Prado websites.

Entry constitutes acceptance of all contest rules.
